Attn: Mark Welch

Re: Dream Home

I would like to personally thank "Welch Construction" for all the efforts afforded our dream home. Our home was custom built with many different factors involved to make our home not only functional in our current lives but also friendly as we continue to age.

This home was built from 300 miles away with communication regularly from Mark, via internet. Amazingly enough it turned out perfect, we received regular updates from Mark as to the status of our progress along with weekly photos. This was the highlight of our Friday nights for some time.

It was a pleasure to work with all the individuals with Welch Construction especially "Mark". As numerous times he would ask do you want this or that – I asked his opinion and took his advise on numerous issues he also picked out some of the lighting and hardware styles. All of which are very complimentary to the home. We felt as if our needs and desires where understood by Welch Const. and they performed with our interest's in mind.

Another reason we are extremely thankful for the timely construction, is because our home in Wichita sold, leaving us homeless unless our construction could be completed. I called Mark on Jan. 8, 2008 and asked if he could finalize the project by Feb. 15<sup>th</sup>. We moved in on the 15<sup>th</sup> of Feb, with but a few unfinished issues. Welch Const. was able to finalize the interior for occupancy in the dead of winter. This was a big task to put on the crew but they finalized the project, we are very thankful for all their efforts.

Thanks again "Mark Welch" and crew for a beautiful dream home and the opportunity to work with professional builders, we love our home.

Best Regards,

Dave & Sanna Lindley
